

Why a Broker is best...

We work for you.

Impartiality

We are not biased towards or against any particular provider and pick the best option for you looking at your criteria

Our Relationship with you

An Insurance Broker is interested in building customer loyalty and long term relationships with his / her clients.

The Best Price

Value for money comes down to more than price when picking an insurance provider and while as a broker we may well get the lowest price, our focus will also be on true value for money i.e. benefits to the client.

Choice

We are in business more than 56 years & have access to the widest range of insurance providers and can therefore offer you choice – a one stop shop where you can pick what suits you!

The Best Advice

We offer a consumer a Statement of Suitability document outlining all the options available to you and the reason why we are recommending one particular policy over another.

Simplicity

We communicate in layman's language because insurance by nature, is a jargon filled world and confusing for many.

By dealing with us you will clearly understand all the risks that exist and the choices available to you to reduce or eliminate these risks.

We know the market

56 years in business and our many years of experience mean that we have relationships with the insurers and understand the technicalities of the products and the service levels our customers can expect from those companies. We match your particular needs with the best insurer offering.

If the worst happens

We will guide you through the claims process, managing the claim on your behalf and advocating for you. Our goal is to reduce the burden and stress of your claim and get you back in action again.

Qualified Professionals

Our team are fully trained and fully qualified professionals. You can rely on our expertise.
